

TECHZUNO

Website Content — Full Copy Deck

Prepared for: Techzuno Solutions OPC Pvt Ltd | Kolkata, India

How to use this document

This deck contains client-ready website copy mapped page-by-page to your existing design mockups (Home, About, Services, Web Development, App Development, UI/UX Design, SEO, E-Commerce Integration, IT Business Solutions, Pricing, FAQ, Contact, Blog). Each page includes an SEO meta block, hero copy, section copy, and CTA text — ready to drop into the CMS. Placeholder text (Lorem Ipsum, repeated FAQ questions) from the mockups has been replaced with final copy.

01. Homepage

SEO Meta Title: Techzuno | Web & App Development Company in Kolkata

Meta Description: Techzuno is Kolkata's leading web design, app development and IT solutions company. Custom, SEO-friendly websites and software built to grow your business.

URL Slug: *techzuno.com/*

Hero

Elevating Outsourcing — Where Craftsmanship Meets Commitment.

Where Vision Meets Innovation, Software Solution

Now is always the right time to start. Techzuno turns your idea into a fast, functional, beautifully designed product — from your first line of code to launch day and beyond.

CTA Button: Start Now

Trust Strip

- 98% — Delivering results with a proven 98% client success rate
- 50+ — Trusted clients for software solutions

Our Company

Kolkata's Leading Website Development & Design Company

Searching for the top web development company in Kolkata? Our team of designers, developers and strategists builds modern, responsive, user-friendly websites tailored to your business — from e-commerce stores to full corporate platforms. We combine clean design with solid engineering, so your site doesn't just look good, it performs: fast load times, mobile-first layouts, and SEO built in from day one. Partner with Techzuno to build an online identity that brings in more of the right customers.

CTA Button: Find More About Techzuno →

Service Highlights (3-card row)

Web Development

Custom, responsive websites engineered for speed, search visibility, and conversions — built on modern stacks like Next.js, React, and WordPress.

App Development

Native and cross-platform mobile apps that keep users coming back, from first wireframe to App Store launch.

UI/UX Design

Interfaces people actually enjoy using — researched, wireframed, and tested before a single line of code is written.

CTA Button: Explore Our Services → (repeats under each card)

Reliable Website Design Company in Kolkata

Whether you're a startup building your first site or an established business overhauling an outdated one, Techzuno delivers complete website design services in Kolkata that boost your brand presence and help you reach more customers — backed by a team that stays on the tools long after launch.

Tech Stack Strip

Tools We Master To Build Digital Excellence: PHP, MySQL, Python, WordPress, Node.js, React Native, Tailwind CSS

Founder Quote

"At Techzuno, diverse experiences and a passion for innovation shape everything we build — and that's something we're truly proud of." — Bishal Kayal, CEO & Founder

Why Choose Techzuno?

Below are 4 reasons that make us different:

- **Customised** — We build for your business, not a template. Every website or app is tailored to your goals, users, and growth plans.
- **High-Quality** — From code to content, we hold ourselves to a standard that's built to last — tested, documented, and secure.
- **Experience** — Years of hands-on delivery across web, mobile, and cloud projects, for startups and established brands alike.
- **Support** — Launch day isn't the finish line. We stay on for maintenance, updates, and whatever comes next.

CTA Button: Find More About Techzuno →

Client Testimonials

We go beyond maintaining operations — we empower businesses with data, insights, and best practices to stay ahead in an ever-evolving digital landscape.

[Note: Sample testimonial cards on the design use placeholder Lorem Ipsum quotes and a stock photo — swap these for 3 real client quotes with name, company/role, and (with permission) a photo before launch. A short quote-collection form after project sign-off is the easiest way to source these.]

02. About Us

SEO Meta Title: About Techzuno | India's Web & App Development Company

Meta Description: Meet the team behind Techzuno — a Kolkata-founded web and app development company delivering fast, functional, beautifully designed digital products since 2022.

URL Slug: *techzuno.com/about*

Our Company

India's Leading Web & App Development Company

Founded with a passion for digital innovation, Techzuno delivers high-quality web and mobile app solutions tailored to modern business needs. From startups to scaling enterprises, we help brands build fast, functional, and beautifully designed digital products. We specialise in technologies like Next.js, React, Python, WordPress, and Shopify — crafting every solution with precision and care. With a focus on performance, clean design, and scalability, our work is built to grow with you, not around you. At Techzuno, we don't just write code — we help you turn ideas into impact through smart development and honest collaboration.

CTA Button: Download Company Profile →

Build Professional Web and Apps With Passion

- 730+ — Successfully built and deployed web and app solutions across industries
- 120+ — Happy clients, long-term partnerships with startups, SMEs, and global teams
- 4+ — Years of experience in design, development, and digital growth

Our Vision

To be the outsourcing partner businesses actually trust — the team you call when the deadline is real and the product has to work. We want every brand we build for, from a first-time founder to a scaling enterprise, to see their idea handled with the same care we'd give our own.

Our Mission

To deliver web and mobile products that are fast, functional, and built to grow — using the right technology for the job, not the trendiest one, and staying honest about timelines, costs, and trade-offs at every stage of the project.

Culture & Values — Six Fundamental Principles

CTA Button: Always Ready To Craft Your Next Big Idea →

Flexibility

Requirements change mid-project — that's normal. We build processes that can absorb a pivot without derailing the timeline.

Cultural Awareness

We work with clients across India and abroad, and we design and communicate with that range of audiences in mind.

Open Collaboration

You get visibility into the build, not just the finished product. Regular check-ins, shared boards, and no surprise invoices.

Reliability

Deadlines we set are deadlines we hit. When something's at risk, we tell you early — not the day before delivery.

Honesty & Integrity

If a feature isn't worth the cost, we'll say so. Our job is to build the right product, not just the one that's easiest to sell.

Client Success

A launched site isn't the goal — a site that grows your business is. We measure our work by your results, not just our delivery.

Our History — Milestones

We go beyond maintaining operations — we empower businesses with data, insights, and best practices to stay ahead in an ever-evolving digital landscape.

CTA Button: Download Company Profile →

- **2022** — Techzuno began as a small group of freelance professionals collaborating on web development and design projects.
- **2023** — Formalised as a studio, expanded into mobile app development, and took on our first long-term retainer clients.
- **2024** — Grew the team, added UI/UX and SEO as dedicated service lines, and crossed 500+ projects delivered.
- **2025** — Reached 730+ projects and 120+ clients, with a 5.0 average rating across 50+ reviews.

[Note: Milestone descriptions on the mockup repeat the same line for each year — replace with the real, specific milestone for each year before publishing. The above are placeholder drafts matching the general arc; confirm actual dates/facts with the team.]

03. Services (Hub Page)

SEO Meta Title: Our Services | Web Design, App Development & IT Solutions — Techzuno

Meta Description: Explore Techzuno's full range of services: custom website design, mobile app development, UI/UX, SEO, and IT business solutions — all built in Kolkata for businesses worldwide.

- SaaS Product Development
- Job Portals & Marketplace Solutions

Quick Links: Services We Provide · What You Get · Why Choose Techzuno · FAQs For Service

Founder Quote

"At Techzuno, diverse experiences and a passion for innovation shape everything we build — and that's something we're truly proud of." — Bishal Kayal, CEO

What You Get

- **Project Documentation** — Comprehensive documentation for every project, so your team always has what it needs to manage and maintain your software.
- **Integration Tests & Satisfaction** — Our rigorous testing process ensures your software is robust, reliable, and meets your exact requirements — before it ever reaches your users.
- **Added Business Value** — We focus on solutions that add real value to your business — streamlining operations and increasing efficiency, not just adding features.

- **Post-Launch Support** — Ongoing support and maintenance after launch, so your project keeps performing at its best.
- **Transparent & Detailed Delivery** — Regular, detailed updates on progress and milestones — you always know exactly where your project stands.
- **Intellectual Property Protection** — We take intellectual property protection seriously and keep your software and data secure at every stage.

Why Choose Techzuno

01 — Experienced Team

With years of hands-on experience across web, mobile, and cloud technologies, we bring deep technical expertise and strategic thinking to every project.

02 — Client-First Approach

We prioritise your business goals, ensuring our solutions are not just technologically advanced but also perfectly aligned with your objectives.

03 — Reliable Support

Our commitment extends beyond delivery, with robust post-launch support and maintenance ensuring your systems run smoothly 24/7.

Frequently Asked Questions About Prices

How long does it take to complete a project?

Most websites launch in 3–5 weeks and app projects in 6–10 weeks, depending on scope. We give you a firm timeline after the discovery call, once we understand exactly what you need.

Do you provide post-launch support and maintenance?

Yes. Every project includes a post-launch support window, and we offer ongoing maintenance retainers for updates, monitoring, and fixes after that.

Can I customise my package or combine multiple services?

Absolutely. Our packages are starting points, not fixed bundles — we'll scope a custom plan if you need web development, app development, and SEO together.

Case Studies — Client Success Stories

[Note: The mockup shows a placeholder logo grid. Replace with 3–6 real client case studies (logo, one-line result, link to full write-up) once available — this section is a strong trust-builder and worth prioritising as content becomes available.]

10. Pricing

SEO Meta Title: Pricing & Plans | Techzuno Web & App Development

Meta Description: Transparent pricing for Techzuno's web design, mobile app, and business solutions packages — flexible plans that adapt to your budget and needs.

URL Slug: *techzuno.com/pricing*

Hero

Pricing and Plans

Flexible, Transparent Pricing That Adapts to Your Needs

Business Solutions — Rs. 24,999

Scalable digital strategy for brands that need more than a website — CRM, workflows, and reporting built around how you actually operate.

- Business consultation & digital planning
- Workflow automation setup
- CRM integration assistance
- Branding and identity alignment
- Performance reporting & optimisation

CTA Button: Get Started

Custom Web Design UI/UX — Rs. 19,999 (Most Popular)

A fully custom, SEO-ready website with a design system built around your brand — not a theme.

- Business consultation & digital planning
- Workflow automation setup
- CRM integration assistance
- Branding and identity alignment
- Performance reporting & optimisation

CTA Button: Get Started

Mobile App Development — Rs. 24,999

A launch-ready mobile app, from wireframe to App Store submission, built for how your customers actually use their phones.

- Business consultation & digital planning
- Workflow automation setup
- CRM integration assistance
- Branding and identity alignment

- Performance reporting & optimisation

CTA Button: Get Started

[Note: The mockup lists identical service inclusions under all three plans and repeats each plan twice — this is very likely a design/data placeholder. Recommend differentiating the inclusion list per plan (e.g., app plan should list app store submission, device testing, push notifications rather than "branding and identity alignment") before this goes live, and confirming final Rs. figures with the team.]

Frequently Asked Questions About Prices

11. FAQ

SEO Meta Title: FAQs | Techzuno Web & App Development

Meta Description: Answers to the most common questions about working with Techzuno — timelines, pricing, support, and the process from kickoff to launch.

URL Slug: techzuno.com/faq

An FAQ page is a webpage of the questions most often asked by your prospective and current customers.

Please call our office at +91 62903 40824 or email us with your question.

Top 10 FAQs About Customer Experience

How long does it take to complete a project?

Most websites launch in 3–5 weeks and app projects in 6–10 weeks. Timelines depend on scope, and we confirm a firm date after the discovery call.

Do you provide post-launch support and maintenance?

Yes — every project includes a post-launch support window, plus optional ongoing maintenance retainers for updates and monitoring.

Can I customise my package or combine multiple services?

Yes. Our pricing plans are starting points — we'll scope a custom package if you need web, app, and SEO together, or anything in between.

What technologies do you work with?

We build primarily on Next.js, React, React Native, Python, WordPress, Shopify, MySQL, and Node.js, choosing the right stack for each project rather than a single default.

Do you work with clients outside Kolkata or India?

Yes — we work with clients across India and internationally, with async-friendly workflows and flexible meeting times across time zones.

How do I get started with a project?

Fill out the contact form or call our office. We'll set up a free consultation to understand your requirements before sending a proposal.

Will I own the code and design once the project is complete?

Yes. Once the project is delivered and paid for in full, all code, design files, and intellectual property transfer to you.

What's included in project documentation?

Technical documentation, user guides, and handoff notes — everything your team needs to maintain, scale, or hand the project to another developer.

Do you offer a payment plan?

Yes, most projects are split into milestone-based payments tied to project phases rather than a single upfront cost.

What if I need changes after the project is delivered?

Minor fixes are covered in your post-launch support window. Larger feature requests are scoped and quoted separately.

Please call our office at +91 62903 40824 or email us with your question.
